BUILDING  
SITES

**Biax**<sup>®</sup>

Maximum coverage with minimum transportation space.

Drainage runs within the slab for future-proof performance and high efficiency on site.

Stable during pours and excellent concrete finishing results.

Underfloor hydronic heating has never been so simple.

The only releveable foundation that does not require internal jacking points.

Not only new builds:  
The perfect solution for existing houses  
that require a full foundation replacement.
